ICD-10-CM Coding Reference Guide 2019-2020

An Anthem Company

There are more than 72,000 diagnosis (ICD-10-CM) codes to select from requiring a greater level of specificity in medical record documentation to ensure the most appropriate code is reported. Along with some helpful coding tips, this ICD-10-CM Coding Reference Guide contains just a few of the more commonly reported conditions. The codes identified with a dash (-) at the end require additional characters for valid ICD-10-CM code assignment. This guide is not all inclusive. Reference the ICD-10-CM codebook for the complete code set, full code descriptions and further coding guidance.
