

A message from the Department of Health Care Finance.

All providers are required to be enrolled with State Medicaid programs

The *21st Century Cures Act*, a federal law enacted by Congress, requires all Medicaid Managed Care network providers to be enrolled with State Medicaid programs by January 1, 2018. Amerigroup District of Columbia, Inc. is a Medicaid Managed Care Organization serving individuals enrolled in the D.C. Medicaid program. The purpose of this notification is to remind you to enroll in the D.C. Medicaid program by May 1, 2018, if you haven't already. If you do not enroll by this deadline, Amerigroup will commence procedures to terminate you from its provider network. **Please note that enrollment in the D.C. Medicaid program does not obligate you to accept, or otherwise serve Medicaid fee-for-service patients.**

The Department of Health Care Finance (DHCF) is the single state agency that administers the Medicaid program in the District of Columbia. DHCF is working to make the enrollment process as simple as possible. You may enroll in the D.C. Medicaid program online at any time through the Provider Data Management System (PDMS), available at <https://www.dcpdms.com/Account/Login.aspx>. After you log into the PDMS website, select the "Streamlined" application type to begin enrollment. No application fee is required for this application type.

Please note that the PDMS website contains an enrollment guide entitled *How to Enroll in DC Medicaid Using the DC Provider Screening and Enrollment Web Portal*. You may also contact the PDMS system vendor MAXIMUS directly for technical assistance at 1-844-218-9700, or by e-mail at dcprovider.registration@maximus.com. For general questions regarding enrollment in the D.C. Medicaid program, you can contact the Department of Health Care Finance (DHCF) directly at 202-698-2000.

Thank you for your attention and cooperation with this important initiative.
