

Clinician-administered drug requirements

Summary of update: Amerigroup is clarifying clinician-administered drug (CAD) requirements for Rho(D) immune globulin injections including RhoGam.

What is the impact of this change?

RhoGam is a CAD in the STAR, STAR+PLUS, STAR Kids and CHIP programs. As a reminder, CAD claims must be billed as outlined in the *NDC-to-HCPCS Crosswalk* found on the Texas Health and Human Services Vendor Drug Program website. It's vital to ensure claims for Rho(D) immune globulin injections including RhoGam are billed correctly. Any incorrect submissions will deny and will require correction. Below is a table of commonly submitted drugs:

This table is an extract from the June crosswalk and is subject to change. As a reminder, there are other drugs available for administration other than name-branded RhoGam. Whether using this specific brand or another, all claims must be received with the correct information. Please verify with the *NDC-to-HCPCS Crosswalk*, which is updated monthly. You can find other valuable information, including CAD provider training and an FAQ, on the website as well.
