Imagine More from your Medicaid Network Partner

MultiPlan's Texas True Choice network is one of the largest independently contracted medical networks in Texas with more than 46,000 physicians and 380 acute care hospitals throughout the state. Through our partners, Texas True Choice also serves the needs of those participating in Texas' government healthcare programs.

As one of the premier networks accessed by entities authorized to provide benefits under the CHIP and STAR Health programs, Texas True Choice is in an ideal position to serve as a key network for the STAR program as it expands into the Medicaid Rural Service Area. In fact, we are actively working with Amerigroup to deliver the Medicaid Managed Care Expansion, which offers our providers an opportunity to expand their participation in our networks.

Our Government Experience

The majority of providers in our PPO networks participate in these programs, which have been Texas True Choice hallmark programs since 2004:

- STAR Health. This program provides healthcare services for children in foster care. About 30,000 members access Texas True Choice providers through this program statewide.
- Texas Children's Health Insurance Program (CHIP). Texas True Choice works with HHSC-approved payers to deliver a managed care network to cover uninsured children in families with incomes that are modest but too high to qualify for Medicaid. Supporting the CHIP EPO model, Texas True Choice delivers network access to nearly 125,000 enrollees in 164 rural counties throughout the state.
- CHIP Perinatal. Texas True Choice also supports the unborn children of women with household incomes below the poverty line within these 164 rural counties.
