

Keeping up with routine vaccinations during COVID-19

Well-child visits and vaccinations are essential services

In May 2020, the CDC released a [report](#) showing a drop in routine childhood vaccinations as a result of COVID-19; a result of stay-at-home orders and concerns about infection during well-child visits. Both the American Academy of Pediatrics and the CDC recommend the continuation of routine childhood vaccinations during the COVID-19 pandemic, noting they are essential services.

To encourage well-visits and vaccinations, here are some extra steps you can take to ensure visits are as safe as possible for both patients and staff. They include:

- Scheduling sick visits and well-child visits during different times of the day.
- Asking patients to remain outside until it's time for their appointment to reduce the number of people in waiting rooms.
- Offering sick visits and well-child visits in different locations.

It is important to identify those children who missed immunizations and well-child visits to schedule these essential in-person appointments. To help, the CDC has published [vaccine catch-up guidance](#) on their website.

Help your patients earn rewards

For additional encouragement, Amerigroup Community Care members can earn \$25 or more in gift cards for completing vaccines and/or well visits through our **Healthy Rewards** program. Please encourage your patients to enroll in the program on the Amerigroup website so they can earn rewards for these activities.

<https://provider.amerigroup.com>

See the chart below:

Amerigroup	Flu and rotavirus	Human papillomavirus (HPV)	Child and Adolescent Well Care Visits (WCV)	Adult well
Ages	0 to 1 (before 2nd birthday)	9 to 12 (before 13th birthday)	2-20	21 and older
Reward amount	\$25	\$50	\$50	\$20

Patients can enroll [online](#) or by calling **888-990-8681 (TTY 711)**.

Helpful information for keeping babies and children healthy

Childhood Immunization Status (CIS) HEDIS® measure requires that all children are immunized by their 2nd birthday:

- Four DTap (diphtheria, tetanus and acellular pertussis)
- Three IPV (polio)
- One MMR (measles, mumps, rubella)
- Three HiB (H influenza type B)
- Three Hep B (hepatitis B)
- One VZV (chicken pox)
- Four PCV (pneumococcal conjugate)
- One Hep A (hepatitis A)
- Two or three RV (rotavirus)
- Two influenza (flu)

Billing codes:

- **MMR:**
 - CPT®: 90707, 90710
 - ICD-10-CM: B05.0-4, B05.81, B05.89, B05.9
- **Mumps:**
 - ICD-10-CM: B26.0-3, B26.81-85, B26.89, B26.9
- **Rubella:**
 - ICD-10-CM: B06.-00-02, B06.09, B06.81-82, B06.89, B06.9
- **Rubella antibody:**
 - CPT: 86762
- **Hepatitis A:**
 - CPT: 90633
 - ICD-10-CM: B15.0, B15.9
- **Influenza:**
 - CPT: 90655, 90657, 90662, 90673, 90685, 90686-90689
 - HCPCS: G0008
- **Rotavirus vaccine (RV):**
 - CPT: 90681 (two-dose), 90680 (three-dose)

HEDIS® is a registered trademark of the National Committee for Quality Assurance (NCQA).

Children should be fully immunized by 13 years of age to meet the Immunization for Adolescents (IMA) HEDIS measure:

- One meningococcal vaccine (MCV) injection between 11 and 13 years of age
- One tetanus, diphtheria toxoids and acellular pertussis vaccine (Tdap/Td) between 10 and 13 years of age
- Two or three HPV vaccines between 9 and 13 years of age

Billing codes:

- **Meningococcal:**
 - CPT: 90734
- **Tdap:**
 - CPT: 90715
- **HPV:**
 - CPT: 90649, 90650, 90651

Please refer to the Amerigroup HEDIS coding booklet for coding guidelines.
