Statin Therapy for Patients with Cardiovascular Disease (SPC) 83
Statin Therapy for Patients With Diabetes (SPD) 85
Diabetes Screening for People With Schizophrenia or Bipolar Disorder Who Are Using Antipsychotic Medications (SSD) 88
Topical Fluoride for Children (TFC) 92
Appropriate Treatment for Upper Respiratory Infection (URI) 93
Well-Child Visits in the First 30 Months of Life (W30) 96
Weight Assessment and Counseling for Nutrition and Physical Activity for Children/ Adolescents (WCC) 98
Child and Adolescent Well-Care Visits (WCV) 101

The codes and measure tips listed are informational only, not clinical guidelines or standards of medical care, and do not guarantee reimbursement. All enrollee care and related decisions of treatment are the sole responsibility of the provider. This information does not dictate or control your clinical decisions regarding the appropriate care of enrollees. Your state/provider contract(s), Medicaid, enrollee benefits and several other guidelines determine reimbursement for the applicable codes. Proper coding and providing appropriate care decrease the need for high volume of medical record review requests and provider audits. It also helps us review your performance on the quality of care that is provided to our enrollees and meet the HEDIS measure for quality reporting based on the care you provide our enrollees. Please note: The information provided is based on HEDIS MY2025 technical specifications and is subject to change based on guidance given by the National Committee for Quality Assurance (NCQA), the Centers for Medicare & Medicaid Services (CMS) and state recommendations. Please refer to the appropriate agency for additional guidance.

Avoidance of Antibiotic Treatment for Acute Bronchitis/Bronchiolitis (AAB)

This HEDIS® measure looks at the percentage of episodes for patients ages 3 months and older with a diagnosis of acute bronchitis/ bronchiolitis that did not result in an antibiotic dispensing event July 1 of the year prior to the measurement year to June 30 of the measurement year.

Exclusions:

- Patients who use hospice services or elect to use a hospice benefit anytime during the measurement year
- Patients who die any time during the measurement year.

Description	CPT/HCPCS
Outpatient, ED and Telehealth	CPT® 98966, 98967, 98968, 98970, 98971, 98972, 98980, 98981, 99202, 99203, 99204, 99205, 99211, 99212, 99213, 99214, 99215, 99242, 99243, 99244, 99245, 99281, 99282, 99283, 99284, 99285, 99341, 99342, 99344, 99345, 99347, 99348, 99349, 99350, 99381, 99382, 99383, 99384, 99385, 99386, 99387, 99391, 99392, 99393, 99394, 99395, 99396, 99397, 99401, 99402, 99403, 99404, 99411, 99412, 99421, 99422, 99423, 99429, 99441, 99442, 99443, 99455, 99456, 99457, 99458, 99483 HCPCS G0071: Payment for communication technology-based services for 5 minutes or more of a virtual (non-face-to-face) communication between an rural health clinic (RHC) or federally qualified health center (FQHC) practitioner and RHC or FQHC patient, or 5 minutes or more of remote evaluation of recorded video and/or images by an RHC or FQHC practitioner, occurring in lieu of an office visit; RHC or FQHC only G0402: Initial preventive physical examination; face-to-face visit, services limited to new beneficiary during the first 12 months of Medicare enrollment G0438: Annual wellness visit; includes a personalized prevention plan of service (pps), initial visit G0439: Annual wellness visit, includes a personalized prevention plan of service (pps), subsequent visit G0463: Hospital outpatient clinic visit for assessment and management of a patient G2010: Remote evaluation of recorded video and/or images submitted by an established patient (for example, store and forward), including interpretation with follow-up with the patient within 24 business hours, not

The codes and measure tips listed are informational only, not clinical guidelines or standards of medical care, and do not guarantee reimbursement. All enrollee care and related decisions of treatment are the sole responsibility of the provider. This information does not dictate or control your clinical decisions regarding the appropriate care of patients. Your state/provider contract(s), Medicaid, enrollee benefits and several other guidelines determine reimbursement for the applicable codes. Proper coding and providing appropriate care decrease the need for high volume of medical record review requests and provider audits. It also helps us review your performance on the quality of care that is provided to our enrollees and meet the HEDIS measure for quality reporting based on the care you provide our patients. Please note: The information provided is based on HEDIS MY2024 technical specifications and is subject to change based on guidance given by the National Committee for Quality Assurance (NCQA), the Centers for Medicare & Medicaid Services (CMS) and state recommendations. Please refer to the appropriate agency for additional guidance.

Note: The codes listed are informational only; this information does not guarantee benefit coverage or reimbursement.

Helpful tips:

- If a patient insists on an antibiotic:
- Refer to the illness as a chest cold rather than bronchitis; patients tend to associate the label with a less-frequent need for antibiotics.
- The illness is caused by a virus and antibiotics do not work on viruses. Only treat with an antibiotic if the patient has a comorbid condition. If utilizing an electronic medical record (EMR) system, consider electronic data sharing with your health plan to capture all coded elements. Contact your provider relationship management representative for additional details and questions.

How can we help?

We help you with avoidance of antibiotic treatment for patients with acute bronchitis/bronchiolitis by:

- Offering current *Clinical Practice Guidelines* on our provider self-service website.
- Patients may be eligible for transportation assistance at no cost, contact Patient Services for arrangement.

Adults' Access to Preventive/Ambulatory Health Services (AAP)

This HEDIS measure looks at the percentage of patients 20 years of age and older who had an ambulatory or preventive care visit. The organization reports percentages for patients who had an ambulatory or preventive care visit during the measurement year.

Exclusions:

- Patients who use hospice services or elect to use a hospice benefit anytime during the measurement year
- Patients who died during the measurement year

Description	CPT/HCPCS
Ambulatory Visits	CPT 92002, 92004, 92012, 92014, 98966, 98967, 98968, 98970, 98971, 98972, 98980, 98981, 99202, 99203, 99204, 99205, 99211, 99212, 99213, 99214, 99215, 99242, 99243, 99244, 99245, 99304, 99305, 99306, 99307, 99308, 99309, 99310, 99315, 99316, 99341, 99342, 99344, 99345, 99347, 99348, 99349, 99350, 99381, 99382, 99383, 99384, 99385, 99386, 99387, 99391, 99392, 99393, 99394, 99395, 99396, 99397, 99401, 99402, 99403, 99404, 99411, 99412, 99421, 99422, 99423, 99429, 99441, 99442, 99443, 99457, 99458, 99483 HCPCS G0071: Payment for communication technology-based services for 5 minutes or more of a virtual (non-face-to-face) communication between an rural health clinic (RHC) or federally qualified health center (FQHC) practitioner and RHC or FQHC patient, or 5 minutes or more of remote evaluation of recorded video and/or images by an RHC or FQHC practitioner, occurring in lieu of an office visit; RHC or FQHC only G0402: Initial preventive physical examination; face-to-face visit, services limited to new beneficiary during the first 12 months of Medicare enrollment G0438: Annual wellness visit; includes a personalized prevention plan of service (pps), initial visit G0439: Annual wellness visit, includes a personalized prevention plan of service (pps), subsequent visit G0463: Hospital outpatient clinic visit for assessment and management of a patient G2010: Remote evaluation of recorded video and/or images submitted by an established patient (for example, store and forward), including interpretation with follow-up with the patient within 24 business hours, not originating from a related e/m service provided within the previous 7 days nor leading to an e/m service or procedure within the next 24 hours or soonest available appointment

Description	CPT/HCPCS
	G2012: Brief communication technology-based service, for example, virtual check-in, by a physician or other qualified health care professional who can report evaluation and management services, provided to an established patient, not originating from a related e/m service provided within the previous 7 days nor leading to an e/m service or procedure within the next 24 hours or soonest available appointment; 5-10 minutes of medical discussion G2250: Remote assessment of recorded video and/or images submitted by an established patient (for example, store and forward), including interpretation with follow-up with the patient within 24 business hours, not originating from a related service provided within the previous 7 days nor leading to a service or procedure within the next 24 hours or soonest available appointment G2251: Brief communication technology-based service, for example, virtual check-in, by a qualified health care professional who cannot report evaluation and management services, provided to an established patient, not originating from a related service provided within the previous 7 days nor leading to a service or procedure within the next 24 hours or soonest available appointment; 5-10 minutes of clinical discussion G2252: Brief communication technology-based service, for example, virtual check-in, by a physician or other qualified health care professional who can report evaluation and management services, provided to an established patient, not originating from a related e/m service provided within the previous 7 days nor leading to an e/m service or procedure within the next 24 hours or soonest available appointment; 11-20 minutes of medical discussion S0620: Routine ophthalmological examination including refraction; new patient S0621: Routine ophthalmological examination including refraction; established patient T1015: Clinic visit/encounter, all-inclusive
Description	**ICD10CM**
Reason for Ambulatory Visit	Z00.00: Encounter for general adult medical examination without abnormal findings Z00.01: Encounter for general adult medical examination with abnormal findings Z00.3: Encounter for examination for adolescent development state Z00.5: Encounter for examination of potential donor of organ and tissue Z00.8: Encounter for other general examination Z02.0: Encounter for examination for admission to educational institution Z02.1: Encounter for pre-employment examination Z02.2: Encounter for examination for admission to residential institution Z02.3: Encounter for examination for recruitment to armed forces Z02.4: Encounter for examination for driving license Z02.5: Encounter for examination for participation in sport

Description	CPT/HCPCS

Note: The codes listed are informational only; this information does not guarantee benefit coverage or reimbursement.

Helpful tips:

- If utilizing an EMR system, consider electronic data sharing with your health plan to capture all coded elements. Contact your provider relationship management representative for additional details and questions.

How can we help?

- Patients may be eligible for transportation assistance at no cost, contact Patient Services for arrangement.

Asthma Medication Ratio (AMR)

This HEDIS measure looks at the percentage of patients 5 to 64 years of age who were identified as having persistent asthma and had a ratio of controller medications to total asthma medications of 0.5 or greater during the measurement year.

Record your efforts:

- Oral medication dispensing event: Multiple prescriptions for different medications dispensed on the same day are counted as separate dispensing events — If multiple prescriptions for the same medication are dispensed on the same day, sum up the days' supply and divide by 30. Use the drug ID to determine if the prescriptions are the same or different.
- Inhaler dispensing event: All inhalers (for example, canisters) of the same medication dispensed on the same day count as one dispensing event — Medications with different drug IDs dispensed on the same day are counted as different dispensing events.
- Injection dispensing events: Each injection counts as one dispensing event. Multiple dispensed injections of the same or different medications count as separate dispensing events.
- Units of medications: When identifying medication units for the numerator, count each individual medication, defined as an amount lasting 30 days or less, as one medication unit. One medication unit equals one inhaler canister, one injection, one infusion, or a 30-day or less supply of an oral medication.

Exclusions:

- Patients who use hospice services or elect to use a hospice benefit any time during the measurement year
- Patients who die any time during the measurement year
- Patients who had no asthma controller or reliever medications dispensed during the measurement year.
- Patients who had a diagnosis that requires a different treatment approach than patients with asthma any time during the patient's history through December 31 of the measurement year. Do not include laboratory claims (claims with POS code 81).

CDC Race and Ethnicity	1002-5: American Indian or Alaska Native 2028-9: Asian 2054-5: Black or African American 2076-8: Native Hawaiian or Other Pacific Islander 2106-3: White 2135-2: Hispanic or Latino 2186-5: Not Hispanic or Latino

Note: The codes listed are informational only; this information does not guarantee benefit coverage or reimbursement.

Helpful tips:

- If utilizing an EMR system, consider electronic data sharing with your health plan to capture all coded elements. Contact your provider relationship management representative for additional details and questions.

How can we help?

- Offering current *Clinical Practice Guideline*s on our provider self-service website.
- Providing you with individual reports of your patients overdue for services if needed.
- Assisting with Patient scheduling if needed.
- Patients may be eligible for transportation assistance at no cost, contact Patient Services for arrangement.

Use of First-Line Psychosocial Care for Children and Adolescents on Antipsychotics (APP)

This HEDIS measure looks at the percentage of children and adolescents 1 to 17 years of age who had a new prescription for an antipsychotic medication and had documentation of psychosocial care as first-line treatment January 1 through December 1 of the measurement year.

Record your efforts

Documentation of psychosocial care or residential behavioral health treatment in the 121-day period from 90 days prior to the IPSD through 30 days after the IPSD.

Exclusions:

- Patients who use hospice services or elect to use a hospice benefit any time during the measurement year.
- Patients who die any time during the measurement year.
- Patients for whom first-line antipsychotic medications may be clinically appropriate: patients with a diagnosis of schizophrenia, schizoaffective disorder, bipolar disorder, other psychotic disorder, autism or other developmental disorder on at least two different dates of service during the measurement year. Do not include laboratory claims (claims with POS code 81).

	F95.1: Chronic motor or vocal tic disorder F95.2: Tourette's disorder F95.8: Other tic disorders F95.9: Tic disorder, unspecified
Residential Behavioral Health Treatment	HCPCS H0017: Behavioral health; residential (hospital residential treatment program), without room and board, per diem H0018: Behavioral health; short-term residential (non-hospital residential treatment program), without room and board, per diem H0019: Behavioral health; long-term residential (non-medical, non-acute care in a residential treatment program where stay is typically longer than 30 days), without room and board, per diem T2048: Behavioral health; long-term care residential (non-acute care in a residential treatment program where stay is typically longer than 30 days), with room and board, per diem
Schizophrenia	ICD10CM F20.0: Paranoid schizophrenia F20.1: Disorganized schizophrenia F20.2: Catatonic schizophrenia F20.3: Undifferentiated schizophrenia F20.5: Residual schizophrenia F20.81: Schizophreniform disorder F20.89: Other schizophrenia F20.9: Schizophrenia, unspecified F25.0: Schizoaffective disorder, bipolar type F25.1: Schizoaffective disorder, depressive type F25.8: Other schizoaffective disorders F25.9: Schizoaffective disorder, unspecified

Note: The codes listed are informational only; this information does not guarantee benefit coverage or reimbursement.

Helpful tip:

- If using an EMR system, consider electronic data sharing with your health plan to capture all coded elements. Contact your provider relationship management representative for additional details and questions.

How can we help?

- Offering current *Clinical Practice Guidelines* on our provider self-service website.
- Providing you with individual reports of your patients overdue for services if needed.
- Assisting with Patient scheduling if needed.
- Patients may be eligible for transportation assistance at no cost, contact Patient Services for arrangement.

Blood Pressure Control for Patients With Diabetes (BPD)

This HEDIS measure looks at the percentage of patients 18 to 75 years of age with diabetes (type 1 and 2) whose blood pressure (BP) was adequately controlled (<140/90 mm Hg) during the measurement year.

Record your efforts

- Patients 18 to 75 years of age whose BP is < 140/90 mm Hg
- If there are multiple BPs on the same date of service, use the lowest systolic and lowest diastolic BP on that date as the representative BP
- BP readings taken by the patient (digital monitor) and documented in the patient's medical record are eligible for use in reporting (provided the BP does not meet any exclusion criteria).

What does not count?

Do not include BP readings:

- Taken during an acute inpatient stay or an ED visit.
- Taken on the same day as a diagnostic test or diagnostic or therapeutic procedure that requires a change in diet or change in medication on or one day before the day of the test or procedure, with the exception of fasting blood tests.
- Taken by the patient using a non-digital device such as with a manual blood pressure cuff and a stethoscope.

Exclusions:

- Patients who use hospice services or elect to use a hospice benefit any time during the measurement year
- Patients who die any time during the measurement year
- Patients receiving palliative care any time during the measurement year.
- Patients who had an encounter for palliative anytime during the measurement year. Do not include laboratory claims (claims with POS code 81).
- Patients 66 years of age and older as of December 31 of the measurement year (all product lines) with frailty and advanced illness. Patients must meet both frailty and advanced illness criteria to be excluded.

Note: The Logical Observation Identifiers Names and Codes (LOINC) are for reporting clinical observations and laboratory testing. The codes listed are informational only; this information does not guarantee benefit coverage or reimbursement.

Helpful tips:

- Improve the accuracy of BP measurements performed by your clinical staff by:
- Providing training materials from the American Heart Association.
- Conducting BP competency tests to validate the education of each clinical staff Patient.
- Making a variety of cuff sizes available.
- Instruct your office staff to recheck BPs for all patients with initial recorded readings greater than systolic 140 mm Hg and diastolic of 90 mm Hg during outpatient office visits; have your staff record the recheck in Patient's medical records.
- Refer high-risk patients to our hypertension programs for additional education and support.
- Educate patients and their spouses, caregivers, or guardians about the elements of a healthy lifestyle such as:
- Heart-healthy eating and a low-salt diet.
- Smoking cessation and avoiding secondhand smoke.
- Adding regular exercise to daily activities.
- Home BP monitoring.
- Ideal body mass index (BMI).
- The importance of taking all prescribed medications as directed.
- Remember to include the applicable Category II reporting code above on the claim form to help reduce the burden of HEDIS medical record review!
- If utilizing an EMR system, consider electronic data sharing with your health plan to capture all coded elements. Contact your provider relationship management representative for additional details and questions.

How can we help?

We support you in helping patients control high blood pressure by:

- Providing online *Clinical Practice Guidelines* on our provider self-service website.

- Reaching out to our hypertensive patients through our programs.
- Helping identify your hypertensive patients.
- Helping you schedule, plan, implement and evaluate a health screening Clinic Day; call your provider relationship management representative to find out more.
- Educating our patients on high blood pressure through health education materials if available.
- Supplying copies of healthy tips for your office.
- Patients may be eligible for transportation assistance at no cost, contact Services for arrangement.

Other available resources

You can find more information and tools online at:

- **nhlbi.nih.gov**
- **cdc.gov/bloodpressure/index.htm**

Controlling High Blood Pressure (CBP)

This HEDIS measure looks at the percentage of patients ages 18 to 85 years who had a diagnosis of hypertension (HTN) and whose blood pressure (BP) was adequately controlled (< 140/90 mm Hg) during the measurement year.

Record your efforts

Document blood pressure and diagnosis of HTN. Patients whose BP is adequately controlled include:

- Patients 18 to 85 years of age who had a diagnosis of HTN and whose BP was adequately controlled (< 140/90 mm Hg) during the measurement year.
- The most recent BP reading during the measurement year on or after the second diagnosis of hypertension:
- If multiple BP measurements occur on the same date or are noted in the chart on the same date, use the lowest systolic and lowest diastolic BP reading.
- If no BP is recorded during the measurement year, assume that the Patient is *not controlled*.

What does not count?

- Taken on the same day as a diagnostic test or diagnostic or therapeutic procedure that requires a change in diet or change in medication on or one day before the day of the test or procedure, with the exception of fasting blood tests.
- Taken during an acute inpatient stay or an ED visit
- Taken by the Patient using a non-digital device such as with a manual blood pressure cuff and a stethoscope.

Exclusions:

- Patients who use hospice services or elect to use a hospice benefit any time during the measurement year
- Patients who die any time during the measurement year
- Patients receiving palliative care any time during the measurement year
- Patients who had an encounter for palliative care anytime during the measurement year. Do not include laboratory claims (claims with POS code 81).
- Patients with a diagnosis that indicates end-stage renal disease (ESRD) any time during the patient's history on or prior to December 31 of the measurement year. Do not include laboratory claims (claims with POS code 81).
- Patients with a procedure that indicates ESRD: dialysis, nephrectomy, or kidney transplant any time during the patient's history on or prior to December 31 of the measurement year.
- Patients with a diagnosis of pregnancy any time during the measurement year.

- Patients 66 to 80 years of age as of December 31 of the measurement year (all product lines) with frailty and advanced illness. Patients must meet BOTH frailty and advanced illness criteria to be excluded.
- Patients 81 years of age and older as of December 31 of the measurement year (all product lines) with at least two indications of frailty with different dates of service during the measurement year.

Chlamydia Screening (CHL)

This HEDIS measure looks at the percentage of patients 16 to 24 years of age who were recommended for routine chlamydia screening, identified as sexually active and who had at least one test for chlamydia during the measurement year.

Record your efforts

Indicate the date the test was performed and the results

Exclusions:

- Patients in hospice or elect to use a hospice benefit any time during the measurement year.
- Patients who died during the measurement year
- Sex Assigned at Birth: (LOINC code 76689-9) Male (LOINC code LA2-8) any time in the patient's history.

Based on a pregnancy test alone and who meet either of the following:

- A pregnancy test during the measurement year and a prescription for isotretinoin on the date of the pregnancy test or the 6 days after
- A pregnancy test during the measurement year and an x-ray on the date of the pregnancy test through 6 days after the pregnancy test.

Helpful tip

- If utilizing an EMR system, consider electronic data sharing with your health plan to capture all coded elements. Contact your provider relationship management representative for additional details and questions.

Cardiac Rehabilitation (CRE)

This HEDIS measure evaluates the percentage of patients 18 years and older who attended cardiac rehabilitation following a qualifying cardiac event, including myocardial infarction, percutaneous coronary intervention, coronary artery bypass grafting, heart and heart/lung transplantation or heart valve repair/replacement on or between July 1 of the year prior to the measurement year to June 30 of the measurement year. Four rates are reported:

- Initiation: The percentage of patients who attended 2 or more sessions of cardiac rehabilitation within 30 days after a qualifying event.
- Engagement 1: The percentage of patients who attended 12 or more sessions of cardiac rehabilitation within 90 days after a qualifying event.
- Engagement 2: The percentage of patients who attended 24 or more sessions of cardiac rehabilitation within 180 days after a qualifying event.
- Achievement: The percentage of patients who attended 36 or more sessions of cardiac rehabilitation within 180 days after a qualifying event.

Record your efforts

Count multiple cardiac rehabilitation sessions on the same date of service as multiple sessions. For example, if a patient has two different codes for cardiac rehabilitation on the same date of service (or one code billed as two units), count this as two sessions of cardiac rehabilitation.

Exclusions:

- Patients who use hospice services or elect to use a hospice benefit any time during the measurement year
- Patients who die any time during the measurement year
- Patients receiving palliative care any time during the measurement year.
- Patients who had an encounter for palliative anytime during the measurement year. Do not include laboratory claims (claims with POS code 81).
- Patients 66 to 80 years of age and older as of December 31 of the measurement year (all product lines) with frailty and advanced illness. Patients must meet both frailty and advanced illness criteria to be excluded. Do not include laboratory claims (claims with POS code 81).
- Patients 81 years of age and older as of December 31 of the measurement year (all product lines) with at least two indications of frailty with different dates of service during the measurement year. Do not include laboratory claims (claims with POS code 81).
- Discharged from an inpatient setting with any of the following on the discharge claim during the 180 days after the episode date:
  - Myocardial Infarction (MI)
  - Coronary artery bypass graft (CABG)
  - Heart or heart/lung transplant

- Heart valve repair or replacement
- Percutaneous Coronary Intervention (PCI)

Description	CPT/HCPCS
Cardiac Rehabilitation	CPT 93797, 93798 HCPCS G0422: Intensive cardiac rehabilitation; with or without continuous ecg monitoring with exercise, per session G0423: Intensive cardiac rehabilitation; with or without continuous ecg monitoring; without exercise, per session S9472: Cardiac rehabilitation program, non-physician provider, per diem

Note: The codes listed are informational only; this information does not guarantee benefit coverage or reimbursement.

How can we help?

- Patients may be eligible for transportation assistance at no cost, contact Services for arrangement.

Helpful tips:

- If utilizing an EMR system, consider electronic data sharing with your health plan to capture all coded elements. Contact your provider relationship management representative for additional details and questions.

Appropriate Testing for Pharyngitis (CWP)

This HEDIS measure evaluates the percentage of episodes for patients 3 years of age and older where the patient was diagnosed with pharyngitis, dispensed an antibiotic and received a group A streptococcus (strep) test for the episode on or between July 1 of the year prior to the measurement year to June 30 of the measurement year.

Record your efforts

- Document results of all strep tests or refusal for testing in medical record.
- If antibiotics are prescribed for another condition, ensure accurate coding and documentation will associate the antibiotic with the appropriate diagnosis.

Exclusions:

- Patients who use hospice services or elect to use a hospice benefit any time during the measurement year
- Patients who die any time during the measurement year

Outpatient, ED and Telehealth	CPT 98966, 98967, 98968, 98970, 98971, 98972, 98980, 98981, 99202, 99203, 99204, 99205, 99211, 99212, 99213, 99214, 99215, 99242, 99243, 99244, 99245, 99281, 99282, 99283, 99284, 99285, 99341, 99342, 99344, 99345, 99347, 99348, 99349, 99350, 99381, 99382, 99383, 99384, 99385, 99386, 99387, 99391, 99392, 99393, 99394, 99395, 99396, 99397, 99401, 99402, 99403, 99404, 99411, 99412, 99421, 99422, 99423, 99429, 99441, 99442, 99443, 99455, 99456, 99457, 99458, 99483 HCPCS G0071: Payment for communication technology-based services for 5 minutes or more of a virtual (non-face-to-face) communication between an rural health clinic (RHC) or federally qualified health center (FQHC) practitioner and RHC or FQHC patient, or 5 minutes or more of remote evaluation of recorded video and/or images by an RHC or FQHC practitioner, occurring in lieu of an office visit; RHC or FQHC only G0402: Initial preventive physical examination; face-to-face visit, services limited to new beneficiary during the first 12 months of Medicare enrollment G0438: Annual wellness visit; includes a personalized prevention plan of service (pps), initial visit G0439: Annual wellness visit, includes a personalized prevention plan of service (pps), subsequent visit G0463: Hospital outpatient clinic visit for assessment and management of a patient G2010: Remote evaluation of recorded video and/or images submitted by an established patient (for example, store and forward), including interpretation with follow-up with the patient within 24 business hours, not originating from a related e/m service provided within the previous 7 days nor leading to an e/m service or procedure within the next 24 hours or soonest available appointment G2012: Brief communication technology-based service, for example, virtual check-in, by a physician or other qualified health care professional

Description	CPT/HCPCS/ICD10CM/LOINC
	who can report evaluation and management services, provided to an established patient, not originating from a related e/m service provided within the previous 7 days nor leading to an e/m service or procedure within the next 24 hours or soonest available appointment; 5-10 minutes of medical discussion G2250: Remote assessment of recorded video and/or images submitted by an established patient (for example, store and forward), including interpretation with follow-up with the patient within 24 business hours, not originating from a related service provided within the previous 7 days nor leading to a service or procedure within the next 24 hours or soonest available appointment G2251: Brief communication technology-based service, for example, virtual check-in, by a qualified health care professional who cannot report evaluation and management services, provided to an established patient, not originating from a related service provided within the previous 7 days nor leading to a service or procedure within the next 24 hours or soonest available appointment; 5-10 minutes of clinical discussion G2252: Brief communication technology-based service, for example, virtual check-in, by a physician or other qualified health care professional who can report evaluation and management services, provided to an established patient, not originating from a related e/m service provided within the previous 7 days nor leading to an e/m service or procedure within the next 24 hours or soonest available appointment; 11-20 minutes of medical discussion T1015: Clinic visit/encounter, all-inclusive

Note: The Logical Observation Identifiers Names and Codes (LOINC) are for reporting clinical observations and laboratory testing. The codes listed are informational only; this information does not guarantee reimbursement.

Helpful tips:

- Refer to the illness as a sore throat due to a cold virus; patients tend to associate the label with a less-frequent need for antibiotics.
- Antibiotics do not work on viruses
- Educate patients on the difference between bacterial and viral infections. This is the key point in the success of this measure. Use CDC handouts or education tools as needed.
- Discuss with patients ways to treat symptoms:
  - Get extra rest.
  - Drink plenty of fluids.
  - Use over-the-counter medications.
  - Use the cool-mist vaporizer and nasal spray for congestion.
  - Eat ice chips or use throat spray/lozenges for sore throats.
- Educate patients and their parents or caregivers that they can prevent infection by:
  - Washing hands frequently.

- Disinfecting toys.
- Keeping the child out of school or day care for at least 24 hours until antibiotics have been taken and symptoms have improved.

- If utilizing an EMR system, consider electronic data sharing with your health plan to capture all coded elements. Contact your provider relationship management representative for additional details and questions.

How can we help?

- Patients may be eligible for transportation assistance at no cost, contact Services for arrangement.

Eye Exam for Patients With Diabetes (EED)

This HEDIS measure looks at the percentage of patients 18 to 75 years of age with diabetes (types 1 and 2) who had a retinal eye exam.

Record your efforts:

- A retinal or dilated eye exam by an eye care professional (optometrist or ophthalmologist) in the measurement year.
- A negative retinal or dilated eye exam (negative for retinopathy) by an eye care professional in the year prior to the measurement year.

- Note: Blindness is not an exclusion for a diabetic eye exam because it is difficult to distinguish between individuals who are legally blind but require a retinal exam and those who are completely blind and therefore do not require an exam.

Exclusions:

- Bilateral eye enucleation any time during the patient's history through December 31 of the measurement year:
  - Unilateral eye enucleation with a bilateral modifier (CPT Modifier code 50).
  - Two unilateral eye enucleations with service dates 14 days or more apart.
  - Left unilateral eye enucleation (ICD-10-PCS code 08T1XZZ) and right unilateral eye enucleation (ICD-10-PCS code 08T0XZZ) on the same or different dates of service.
  - A unilateral eye enucleation and a left unilateral eye enucleation (ICD-10-PCS code 08T1XZZ) with service dates 14 days or more apart.
  - A unilateral eye enucleation (Unilateral Eye Enucleation Value Set) and a right unilateral eye enucleation (ICD-10-PCS code 08T0XZZ) with service dates 14 days or more apart.
- Patients who use hospice services or elect to use a hospice benefit any time during the measurement year
- Patients who die any time during the measurement year
- Patients receiving palliative care any time during the measurement year.
- Patients who had an encounter for palliative anytime during the measurement year. Do not include laboratory claims (claims with POS code 81).

Patients 66 years of age and older as of December 31 of the measurement year (all product lines) with frailty and advanced illness. Patients must meet both frailty and advanced illness criteria to be excluded. Do not include laboratory claims (claims with POS code 81).

CDC Race and Ethnicity	1002-5: American Indian or Alaska Native 2028-9: Asian 2054-5: Black or African American 2076-8: Native Hawaiian or Other Pacific Islander 2106-3: White 2135-2: Hispanic or Latino 2186-5: Not Hispanic or Latino

Note: The codes listed are informational only; this information does not guarantee benefit coverage or reimbursement.

Helpful tips:

- For the recommended frequency of testing and screening, refer to the *Clinical Practice Guidelines* for diabetes mellitus.
- If your practice uses EMRs, have flags or reminders set in the system to alert your staff when a patient's screenings are due.

- Send appointment reminders and call patients to remind them of upcoming appointments and necessary screenings.
- Follow up on lab test results, eye exam results or any specialist referral and document on your chart.
- Refer patients to the network of eye providers for their annual diabetic eye exam.
- Educate your patients and their families, caregivers, and guardians on diabetes care, including:
    - Taking all prescribed medications as directed.
    - Adding regular exercise to daily activities.
    - Having a diabetic eye exam each year with an eye care provider.
    - Regularly monitoring blood sugar and blood pressure at home.
    - Maintaining healthy weight and ideal body mass index.
    - Eating heart-healthy, low-calorie, and low-fat foods.
    - Stopping smoking and avoiding second-hand smoke.
    - Keeping all medical appointments; getting help with scheduling necessary appointments, screenings and tests to improve compliance.
- Remember to include the applicable Category II reporting code above on the claim form to help reduce the burden of HEDIS medical record review.
- If utilizing an electronic medical record (EMR) system, consider electronic data sharing with your health plan to capture all coded elements. Contact your provider relationship management representative for additional details and questions.

How can we help?

We can help you with comprehensive diabetes care by:

- Providing online *Clinical Practice Guidelines* on our provider self-service website.
- Providing programs that may be available to our diabetic patients.
- Supplying copies of educational resources on diabetes that may be available for your office.
- Providing education at your office if available in your area.
- Patients may be eligible for transportation assistance at no cost, contact Patient Services for arrangement.

Follow-up After Emergency Department Visit for Substance Use (FUA)

This HEDIS measure evaluates the percentage of emergency department (ED) visits for patients 13 years of age and older with a principal diagnosis of substance use disorder (SUD), or any diagnosis of drug overdose, for which there was a follow-up. Two rates are reported:

- The percentage of ED visits for which the patient received follow-up within 30 days of the ED visit (31 total days)
- The percentage of ED visits for which the patient received follow-up within seven days of the ED visit (8 total days)

Record your efforts

- *30 Day Follow-Up*: A patient has a follow-up visit or a pharmacotherapy dispensing event 30 days after the ED visit (31 total days). Include visits and pharmacotherapy events that occur on the date of the ED visit.
- *7 Day Follow-Up*: A patient has a follow-up visit or a pharmacotherapy dispensing event 7 days after the ED visit (8 total days). Include visits and pharmacotherapy events that occur on the date of the ED visit.

Exclusions:

- ED visits that result in an inpatient stay
- ED visits followed by residential treatment on the date of the ED visit or within the 30 days after the ED visit.
- Patients who use hospice services or elect to use a hospice benefit anytime during the measurement year
- Patients who died during the measurement year

Helpful tip

If utilizing an EMR system, consider electronic data sharing with your health plan to capture all coded elements. Contact your provider relationship management representative for additional details and questions.

Follow-Up After Hospitalization for Mental Illness (FUH)

This HEDIS measure evaluates the percentage of discharges for patients ages 6 years and older who were hospitalized for a principal diagnosis of mental illness, or any diagnosis of intentional self-harm, and had a mental health follow-up service. Two rates are reported:

- The percentage of discharges for which the patient received follow-up within 30 days after discharge
- The percentage of discharges for which the patient received follow-up within 7 days after discharge

Exclusions:

- Exclude discharges followed by readmission or direct transfer to a nonacute inpatient care setting (except for psychiatric residential treatment) within the 30-day follow-up period, regardless of principal diagnosis for the readmission.
- Patients who use hospice or elect to use a hospice benefit any time during the measurement year.
- Patients who died during the measurement year

Helpful tips:

- Educate your patients and their spouses, caregivers, or guardians about the importance of compliance with long-term medications, if prescribed.
- Encourage patients to participate in our behavioral health case management program for help getting a follow-up discharge appointment within seven days and other support.
- Teach Patient's families to review all discharge instructions for patients and ask for details of all follow-up discharge instructions, such as the dates and times of appointments. The post discharge follow up should optimally be within seven days of discharge.
- Ask patients with a mental health diagnosis to allow you access to their mental health records if you are their primary care provider.
- Telehealth services that are completed by a qualified mental health provider can be used for this measure.
- If utilizing an EMR system, consider electronic data sharing with your health plan to capture all coded elements. Contact your provider relationship management representative for additional details and questions.

How can we help?

We help you with follow-up after hospitalization for mental illness by:

- Offer current *Clinical Practice Guidelines* on our provider self-service website.
- Patients may be eligible for transportation assistance at no cost, contact Patient Services for arrangement.

Follow-Up After High-Intensity Care for Substance Use Disorder (FUI)

This HEDIS measure evaluates the percentage of acute inpatient hospitalizations, residential treatment, or withdrawal management visits for a diagnosis of substance use disorder among patients 13 years of age and older that result in a follow-up visit or service for substance use disorder during the measurement year. Two rates are reported:

- The percentage of visits or discharges for which the patient received follow-up for substance use disorder within the 30 days after the visit or discharge.
- The percentage of visits or discharges for which the patient received follow-up for substance use disorder within the 7 days after the visit or discharge.

Exclusions:

- Patients who use hospice services or elect to use a hospice benefit any time during the measurement year.
- Patients who die any time during the measurement year.

Follow-Up After Emergency Department Visit for Mental Illness (FUM)

This HEDIS measure evaluates the percentage of emergency department (ED) visits for patients ages 6 years and older with a principal diagnosis of mental illness or any diagnosis of intentional self-harm, and who had a mental health follow-up service during the measurement year. Two rates are reported:

1. The percentage of ED visits for which the patient received follow-up within 30 days of the ED visit (31 total days)
2. The percentage of ED visits for which the patient received follow-up within 7 days of the ED visit (8 total days)

Exclusions:

- ED visits that result in an inpatient stay
- ED visits followed by admission to an acute or nonacute inpatient care setting on the date of the ED visit or within the 30 days after the ED visit (31 total days)
- Patients in hospice or using hospice services anytime during the measurement year
- Patients who died during the measurement year

Glycemic Status Assessment for Patients With Diabetes (GSD)

This measure looks at the percentage of patients 18 to 75 years of age with diabetes (types 1 and 2) whose most recent glycemic status (hemoglobin A1c [HbA1c] or glucose management indicator [GMI]) was at the following levels during the measurement year:

- Glycemic Status <8.0%.
- Glycemic Status >9.0%.

Note: A lower rate indicates better performance for this indicator (i.e., low rates of Glycemic Status >9% indicate better care).

Record your efforts:

- Document the result of the most recent glycemic status assessment (HbA1c or GMI) performed during the measurement year
- When identifying the most recent glycemic status assessment (HbA1c or GMI), GMI values must include documentation of the continuous glucose monitoring data date range used to derive the value. The terminal date in the range should be used to assign assessment date.

Exclusions:

- Patients who use hospice services or elect to use a hospice benefit any time during the measurement year
- Patients who die any time during the measurement year
- Patients receiving palliative care any time during the measurement year.
- Patients who had an encounter for palliative anytime during the measurement year. Do not include laboratory claims (claims with POS code 81).
- Patients 66 years of age and older as of December 31 of the measurement year (all product lines) with frailty and advanced illness. Patients must meet both frailty and advanced illness criteria to be excluded. Do not include laboratory claims (claims with POS code 81).

Description	CPT/CPT-CAT II/LOINC

Note: The Logical Observation Identifiers Names and Codes (LOINC) are for reporting clinical observations and laboratory testing. The codes listed are informational only; this information does not guarantee benefit coverage or reimbursement.

Helpful tips:

- For the recommended frequency of testing and screening, refer to the *Clinical Practice Guidelines* for diabetes mellitus.
- If your practice uses EMRs, have flags or reminders set in the system to alert your staff when a patient's screenings are due.
- Send appointment reminders and call patients to remind them of upcoming appointments and necessary screenings.
- Follow up on lab test results and document on your chart.
- Draw labs in your office if accessible or refer patients to a local lab for screenings.

- Educate your patients and their families, caregivers, and guardians on diabetes care, including:
  - Taking all prescribed medications as directed.
  - Adding regular exercise to daily activities.
  - Regularly monitoring blood sugar and blood pressure at home.
  - Maintaining healthy weight and ideal body mass index.
  - Eating heart-healthy, low-calorie, and low-fat foods.
  - Stopping smoking and avoiding second-hand smoke.
  - Fasting prior to having blood sugar and lipid panels drawn to ensure accurate results.
  - Keeping all medical appointments; getting help with scheduling necessary appointments, screenings and tests to improve compliance.
- Remember to include the applicable Category II reporting code above on the claim form to help reduce the burden of HEDIS medical record review.
- If utilizing an electronic medical record (EMR) system, consider electronic data sharing with your health plan to capture all coded elements. Contact your provider relationship management representative for additional details and questions.

How can we help?

We can help you with comprehensive diabetes care by:

- Providing online *Clinical Practice Guidelines* on our provider self-service website.
- Providing programs that may be available to our diabetic patients.
- Supplying copies of educational resources on diabetes that may be available for your office.
- Scheduling Clinic Days or providing education at your office if available in your area.
- Patients may be eligible for transportation assistance at no cost, contact Patient Services for arrangement.

Initiation and Engagement of Substance Use Disorder Treatment (IET)

This measure looks at the percentage of new substance use disorder (SUD) episodes that result in treatment initiation and engagement. Two rates are reported:

- Initiation of SUD Treatment. The percentage of new SUD episodes that result in treatment initiation through an inpatient SUD admission, outpatient visit, intensive outpatient encounter, partial hospitalization, telehealth visits, or medication treatment within 14 days
- Engagement of SUD Treatment. The percentage of new SUD episodes that have evidence of treatment engagement within 34 days of initiation.

Exclusions:

- Patients who use hospice services or elect to use a hospice benefit any time during the measurement year.
- Patients who died during the measurement year

Initiation and engagement of alcohol and other drug dependence treatment (IET) codes:

How can we help?

We can help you with monitoring initiation and engagement of alcohol and other drug dependence treatment by:

- Reaching out to providers to be advocates and providing the resources to educate our patients.
- Calling our behavioral health Provider Service for additional information.
- Guiding with the above noted services to drive Patient success in completing alcohol and other drug dependence treatment.
- Patients may be eligible for transportation assistance at no cost, contact Patient Services for arrangement.

Helpful tip

- If utilizing an electronic medical record (EMR) system, consider electronic data sharing with your health plan to capture all coded elements. Contact your provider relationship management representative for additional details and questions.

Kidney Health Evaluation for Patients with Diabetes (KED)

This measure evaluates the percentage of patients 18 to 85 years of age with diabetes (type 1 and type 2) who received a kidney health evaluation, defined by an estimated glomerular filtration rate (eGFR) *and* a urine albumin-creatinine ratio (uACR), during the measurement year.

Exclusions:

- Patients who use hospice services or elect to use a hospice benefit any time during the measurement year
- Patients who die any time during the measurement year
- Patients receiving palliative care any time during the measurement year
- Patients who had an encounter for palliative care anytime during the measurement year. Do not include laboratory claims (claims with POS code 81).
- Patients with a diagnosis of end-stage renal disease (ESRD) any time during the patient's history on or prior to December 31 of the measurement year. Do not include laboratory claims (claims with POS code 81).
- Patients who had dialysis any time during the patient's history on or prior to December 31 of the measurement year
- Patients 66 to 80 years of age as of December 31 of the measurement year (all product lines) with frailty and advanced illness. Patients must meet BOTH frailty and advanced illness criteria to be excluded. Do not include laboratory claims (claims with POS code 81).
- Patients 81 years of age and older as of December 31 of the measurement year (all product lines) with at least two indications of frailty with different dates of service during the measurement year. Do not include laboratory claims (claims with POS code 81).

Note: The Logical Observation Identifiers Names and Codes (LOINC) are for reporting clinical observations and laboratory testing. The codes listed are informational only; this information does not guarantee benefit coverage or reimbursement.

Helpful tip

- If utilizing an EMR system, consider electronic data sharing with your health plan to capture all coded elements. Contact your provider relationship management representative for additional details and questions.

How can we help?

We help you meet this benchmark by:

- Offering current *Clinical Practice Guidelines* on our provider self-service website.
- Helping identify community resources, such as health education classes that may be available in your area.
- Patients may be eligible for transportation assistance at no cost, contact Patient Services for arrangement.

Use of Imaging Studies for Low Back Pain (LBP)

This HEDIS measure looks at the percentage of patients 18 to 75 years of age with a principal diagnosis of low back pain who did not have an imaging study (plain X-ray, MRI, CT scan) within 28 days of the diagnosis January 1 to December 3 of the measurement year.

The measure is reported as an inverted rate [1–(numerator/eligible population)]. A higher score indicates appropriate treatment of low back pain (for example, the proportion for whom imaging studies did not occur).

Exclusions:

- Patients who use hospice services or elect to use a hospice benefit any time during the measurement year.
- Patients who die any time during the measurement year. Patients receiving palliative care any time during the measurement year.
- Patients who had an encounter for palliative care any time during the measurement year. Do not include laboratory claims (claims with POS code 81).
- Patients 66 years of age or older as of December 31 of the measurement year (all product lines) with frailty and advanced illness. Patients must meet BOTH frailty and advanced illness criteria to be excluded. Do not include laboratory claims (claims with POS code 81).
- Cancer, HIV, history of organ transplant, osteoporosis or spondylopathy any time during the member's history through 28 days after the IESD. Do not include laboratory claims (claims with POS code 81).
- Organ transplant, lumbar surgery or medication treatment for osteoporosis any time during the member's history through 28 days after the IESD.
- IV drug abuse, neurologic impairment or spinal infection any time during the 365 days prior to the IESD through 28 days after the IESD. Do not include laboratory claims (claims with POS code 81).
- Trauma or a fragility fracture any time during the 90 days prior to the IESD through 28 days after the IESD. Do not include laboratory claims (claims with POS
- code 81).
- Prolonged use of corticosteroids. 90 consecutive days of corticosteroid treatment any time during the 366-day period that begins 365 days prior to the IESD and ends on the IESD.

Note: The codes listed are informational only; this information does not guarantee benefit coverage or reimbursement.

How can we help?

We help you meet this benchmark by:

- Offering current *Clinical Practice Guidelines* on our provider self-service website.
- Helping identify community resources, such as health education classes that may be available in your area.
- Patients may be eligible for transportation assistance at no cost, contact Patient Services for arrangement.

Helpful tip

- If utilizing an EMR system, consider electronic data sharing with your health plan to capture all coded elements. Contact your provider relationship management representative for additional details and questions.

Lead Screening in Children (LSC)

This HEDIS measure looks at the percentage of children 2 years of age who had one or more capillary or venous lead blood tests for lead poisoning by their 2nd birthday.

Record your efforts

When documenting lead screening, include:

- Date the test was reported.
- Results or findings.

Note: "Unknown" is not considered a result/finding for medical record reporting.

Exclusions:

- Patients who use hospice services or elect to use a hospice benefit any time during the measurement year.
- Patients who die any time during the measurement year

Codes to identify lead test:

Services	CPT/LOINC
Lead Tests	CPT 83655 LOINC 10368-9: Lead [Mass/volume] in Capillary blood 10912-4: Lead [Mass/volume] in Serum or Plasma 14807-2: Lead [Moles/volume] in Blood 17052-2: Lead [Presence] in Blood 25459-9: Lead [Moles/volume] in Serum or Plasma 27129-6: Lead [Mass/mass] in Red Blood Cells 32325-3: Lead [Moles/volume] in Red Blood Cells 5674-7: Lead [Mass/volume] in Red Blood Cells 77307-7: Lead [Mass/volume] in Venous blood

Note: The Logical Observation Identifiers Names and Codes (LOINC) are for reporting clinical observations and laboratory testing. The codes listed are informational only; this information does not guarantee benefit coverage or reimbursement.

Helpful tips:

- Draw Patient's blood while they are in your office instead of sending them to the lab.
- Consider performing finger stick screenings in your practice.
- Assign one staff Patient to follow up on results when patients are sent to a lab for screening.
- Develop a process to check medical records for lab results to ensure previously ordered lead screenings have been completed and documented.
- Use sick and well-child visits as opportunities to encourage parents to have their child tested.

- Include a lead test reminder with lab name and address on your appointment confirmation/reminder cards.
- If utilizing an EMR system, consider electronic data sharing with your health plan to capture all coded elements. Contact your provider relationship management representative for additional details and questions.

How can we help?

We help you with lead screening in children by:

- Offering current *Clinical Practice Guidelines* on our provider self-service website
- Patients may be eligible for transportation assistance at no cost, contact Patient Services for arrangement.

Oral Evaluation, Dental Services (OED)

This HEDIS measure looks at the percentage of patients under 21 of age who received a comprehensive or periodic oral evaluation with a dental provider during the measurement year.

Record your efforts:

- Date of evaluation

Exclusions:

- Patients who use hospice services or elect to use a hospice benefit any time during the measurement year.
- Patients who die any time during the measurement year

Codes:

Services	CDT
Oral Evaluation	CDT D0120: Periodic oral evaluation - established patient D0145: Oral evaluation for a patient under three years of age and counseling with primary caregiver D0150: Comprehensive oral evaluation - new or established patient

Note: The codes listed are informational only; this information does not guarantee benefit coverage or reimbursement.

Helpful tips:

- If utilizing an EMR system, consider electronic data sharing with your health plan to capture all coded elements. Contact your provider relationship management representative for additional details and questions.

How can we help?

- Offering current *Clinical Practice Guidelines* on our provider self-service website
- Patients may be eligible for transportation assistance at no cost, contact Patient Services for arrangement.

Prenatal and Postpartum Care (PPC)

This HEDIS measure looks at the percentage deliveries of live births on or between October 8 of the year prior to the measurement year and October 7 of the measurement year. For these patients, the measure assesses the following facets of prenatal and postpartum care:

- Timeliness of prenatal care: The percentage of deliveries that received a prenatal care visit in the first trimester on or before the enrollment start date or within 42 days of enrollment in the organization.
- Postpartum Care: The percentage of deliveries that had a postpartum visit on or between 7 and 84 days after delivery.

Record your efforts

Prenatal care visit must include one of the following:

- Diagnosis of pregnancy
- A physical examination that includes one of the following:
- Auscultation for fetal heart tone
- Pelvic exam with obstetric observations
- Measurement of fundus height
- Evidence that a prenatal care procedure was performed such as one of the following:
  - Obstetric panel including hematocrit, differential WBC count, platelet count, hepatitis B surface antigen, rubella antibody, syphilis test, RBC antibody screen, Rh and ABO blood typing)
  - TORCH antibody panel alone
  - A rubella antibody test/titer with an Rh incompatibility (ABO/Rh) blood typing
  - Ultrasound of a pregnant uterus
- Documentation of LMP, EDD or gestational age in conjunction with *either* of the following:
  - A positive pregnancy test result, or
  - Documentation of gravity and parity, or
  - Prenatal risk assessment and counseling/education, or
  - Complete obstetrical history

Postpartum care visit on or between 7 and 84 days after delivery
Documentation in the medical record must include a note indicating the date when a postpartum visit occurred and any of the following:

- Pelvic exam
- Evaluation of weight, BP, breasts, and abdomen
- Notation of *breastfeeding* is acceptable for the *evaluation of breasts* component
- Notation of postpartum care, including, but not limited to:
  - *Notation of postpartum care, PP care, PP check, 6-week check*
  - *A preprinted Postpartum Care form in which information was documented during the visit*
- Perineal or cesarean incision/wound check

- Screening for depression, anxiety, tobacco use, substance use disorder or preexisting mental health disorders
- Glucose screening for women with gestational diabetes
- Documentation of any of the following topics:
    - *Infant care or breastfeeding*
    - *Resumption of intercourse, birth spacing or family planning*
    - *Sleep/fatigue*
    - *Resumption of physical activity and attainment of healthy weight*

Exclusions:

- Non-live births
- Patients who use hospice services or elect to use a hospice benefit any time during the measurement year.
- Patients who die any time during the measurement year.

- Offering current *Clinical Practice Guidelines* on our provider self-service website.
- Helping identify community resources, such as health education classes that may be available in your area.
- Patients may be eligible for transportation assistance at no cost, contact Patient Services for arrangement.

Helpful tip

- If utilizing an EMR system, consider electronic data sharing with your health plan to capture all coded elements. Contact your provider relationship management provider relationship management representative for additional details and questions.

Statin Therapy for Patients with Cardiovascular Disease (SPC)

This HEDIS measure looks at the percentage of males 21 to 75 years of age and females 40 to 75 years of age during the measurement year, who were identified as having clinical atherosclerotic cardiovascular disease (ASCVD) and met the following criteria. The following rates are reported:

- Received statin therapy: Patients who were dispensed at least one high-intensity or moderate-intensity statin medication during the measurement year.
- Statin adherence 80%: Patients who remained on a high-intensity or moderate-intensity statin medication for at least 80% of the treatment period (treatment period begins with the earliest dispensing event for any high-intensity or moderate-intensity statin medication during the measurement year).

Exclusions:

- Patients who use hospice services or elect to use a hospice benefit any time during the measurement year
- Patients who die any time during the measurement year
- Patients with a diagnosis of pregnancy during the measurement year or the year prior to the measurement year. Do not include laboratory claims (claims with POS code 81).
- In vitro fertilization in the measurement year or the year prior to the measurement year.
- Dispensed at least one prescription for clomiphene during the measurement year or the year prior to the measurement year.
- End stage renal disease (ESRD) during the measurement year or the year prior to the measurement year. Do not include laboratory claims (claims with POS code 81).
- Dialysis during the measurement year or the year prior to the measurement year.
- Cirrhosis during the measurement year or the year prior to the measurement year. Do not include laboratory claims (claims with POS code 81).
- Myalgia, myositis, myopathy, or rhabdomyolysis during the measurement year. Do not include laboratory claims (claims with POS code 81).
- Myalgia or rhabdomyolysis caused by a statin any time during the member's history through December 31 of the measurement year.
- Patients receiving palliative care any time during the measurement year.
- Patients who had an encounter for palliative anytime during the measurement year. Do not include laboratory claims (claims with POS code 81).
- Patients 66 years of age and older as of December 31 of the measurement year (all product lines) with frailty and advanced illness. Patients must meet both frailty and advanced illness criteria to be excluded. Do not include laboratory claims (claims with POS code 81).

High- and Moderate-Intensity Statin Medications

Description	Prescription
High-intensity statin therapy	Atorvastatin 40-80 mg
High-intensity statin therapy	Amlodipine-atorvastatin 40-80 mg
High-intensity statin therapy	Rosuvastatin 20-40 mg
High-intensity statin therapy	Simvastatin 80 mg
High-intensity statin therapy	Ezetimibe-simvastatin 80 mg
Moderate-intensity statin therapy	Atorvastatin 10-20 mg
Moderate-intensity statin therapy	Amlodipine-atorvastatin 10-20 mg
Moderate-intensity statin therapy	Rosuvastatin 5-10 mg
Moderate-intensity statin therapy	Simvastatin 20-40 mg
Moderate-intensity statin therapy	Ezetimibe-simvastatin 20-40 mg
Moderate-intensity statin therapy	Pravastatin 40-80 mg
Moderate-intensity statin therapy	Lovastatin 40 mg
Moderate-intensity statin therapy	Fluvastatin 40-80 mg
Moderate-intensity statin therapy	Pitavastatin 1-4 mg

How can we help?

We help you meet this benchmark by:

- Offering current *Clinical Practice Guidelines* on our provider self-service website.
- Helping identify community resources, such as health education classes that may be available in your area.
- Patients may be eligible for transportation assistance at no cost, contact Patient Services for arrangement.

Helpful tip

- If utilizing an EMR system, consider electronic data sharing with your health plan to capture all coded elements. Contact your provider relationship management representative for additional details and questions.

Statin Therapy for Patients With Diabetes (SPD)

This HEDIS measures looks at the percentage of patients 40 to 75 years of age during the measurement year with diabetes who do not have clinical atherosclerotic cardiovascular disease (ASCVD) who met the following criteria.

Two rates are reported:

- Received statin therapy: patients who were dispensed at least one statin medication of any intensity during the measurement year
- Statin Adherence 80%: patients who remained on a statin medication of any intensity for at least 80% of the treatment period (treatment period begins with the earliest dispensing event for any statin medication during the measurement year).

Record your efforts

- Document review of continued use of prescribed medications during patient visits
- Document evidence of exclusion criteria

Exclusions:

- Patients with at least one of the following during the year prior to the measurement year :
    - Myocardial Infarction (MI) discharged from an inpatient setting with an MI
    - Coronary artery bypass graft (CABG) in any setting
    - Percutaneous Coronary Intervention (PCI) in any setting
    - Other revascularization procedure in any setting
- Patients who had at least one encounter with a diagnosis of IVD during both the measurement year and the year prior to the measurement year.
- Patients with a diagnosis of pregnancy during the measurement year or year prior to the measurement year. Do not include laboratory claims (claims with POS code 81).
- In vitro fertilization in the measurement year or year prior to the measurement year.
- Dispensed at least one prescription for clomiphene during the measurement year or the year prior to the measurement year.
- End stage renal disease (ESRD) during the measurement year or the year prior to the measurement year. Do not include laboratory claims (claims with POS code 81).
- Dialysis during the measurement year or the year prior to the measurement year.
- Cirrhosis during the measurement year or the year prior to the measurement year. Do not include laboratory claims (claims with POS code 81).
- Myalgia, myositis, myopathy, or rhabdomyolysis during the measurement year. Do not include laboratory claims (claims with POS code 81).
- Myalgia or rhabdomyolysis caused by a statin any time during the member’s history through December 31 of the measurement year.

- Patients who use hospice services or elect to use a hospice benefit any time during the measurement year.
- Patients who die any time during the measurement year.
- Patients receiving palliative care any time during the measurement year.
- Patients who had an encounter for palliative care any time during the measurement year. Do not include laboratory claims (claims with POS code 81).
- Patients 66 years of age and older as of December 31 of the measurement year (all product lines) with frailty and advanced illness. Patients must meet both frailty and advanced illness criteria to be excluded. Do not include laboratory claims (claims with POS code 81).

Diabetes Screening for People With Schizophrenia or Bipolar Disorder Who Are Using Antipsychotic Medications (SSD)

This HEDIS measure looks at the percentage of patients 18 to 64 with schizophrenia, schizoaffective disorder, or bipolar disorder and who were dispensed an antipsychotic medication and had a diabetes screening test during the measurement year.

Record your efforts

- Document review of continued use of prescribed medications during patient visits
- Document evidence of exclusion criteria

An antipsychotic medication dispensed event during the measurement year identified by claim/encounter data or pharmacy data and a glucose test or an HbA1c test performed during the measurement year, as identified by claim/encounter or automated laboratory data.

Exclusions:

- Patients who use hospice services or elect to use a hospice benefit any time during the measurement year.
- Patients who die any time during the measurement year.
- Patients with diabetes
- Patients who had no antipsychotic medications dispensed during the measurement year.

Note: The Logical Observation Identifiers Names and Codes (LOINC) are for reporting clinical observations and laboratory testing. The codes listed are informational only; this information does not guarantee benefit coverage or reimbursement.

How can we help?

We help you meet this benchmark by:

- Offering current *Clinical Practice Guidelines* on our provider self-service website.
- Helping identify community resources, such as health education classes that may be available in your area.
- Patients may be eligible for transportation assistance at no cost, contact Patient Services for arrangement.

Helpful tip

- If utilizing an EMR system, consider electronic data sharing with your health plan to capture all coded elements. Contact your provider relationship management representative for additional details and questions.

Topical Fluoride for Children (TFC)

This HEDIS measure looks at the percentage of patients 1 to 4 years of age who received at least two fluoride varnish applications during the measurement year.

Record your efforts

- Two or more fluoride varnish applications on different dates of services

Exclusions:

- Patients who use hospice services or elect to use a hospice benefit any time during the measurement year.
- Patients who died during the measurement year

Codes:

Services	CPT/CDT
Application of Fluoride Varnish	CPT 99188 CDT D1206: Topical application of fluoride varnish

* The codes listed are informational only; this information does not guarantee benefit coverage or reimbursement.

Helpful tips:

- If utilizing an EMR system, consider electronic data sharing with your health plan to capture all coded elements. Contact your provider relationship management representative for additional details and questions.

How can we help?

- Offering current *Clinical Practice Guidelines* on our provider self-service website
- Patients may be eligible for transportation assistance at no cost, contact Patient Services for arrangement.

Appropriate Treatment for Upper Respiratory Infection (URI)

This HEDIS measure looks at the percentage of episodes for patients 3 months of age and older with a diagnosis of upper respiratory infection (URI) that did not result in a dispensed antibiotic dispensing event.

A higher rate indicates appropriate URI treatment (i.e., the proportion of episodes that did not result in an antibiotic dispensing event July 1 of the year prior to the measurement year to June 30 of the measurement year.

Record your efforts:

- Document results of all strep tests or refusal for testing in medical records.
- If antibiotics are prescribed for another condition, ensure accurate coding and documentation will associate the antibiotic with the appropriate diagnosis.

Exclusions:

- Patients who use hospice services or elect to use a hospice benefit any time during the measurement year.
- Patients who die any time during the measurement year.

Description	CPT/HCPCS/ICD10CM
	G0071: Payment for communication technology-based services for 5 minutes or more of a virtual (non-face-to-face) communication between an rural health clinic (RHC) or federally qualified health center (FQHC) practitioner and RHC or FQHC patient, or 5 minutes or more of remote evaluation of recorded video and/or images by an RHC or FQHC practitioner, occurring in lieu of an office visit; RHC or FQHC only G0402: Initial preventive physical examination; face-to-face visit, services limited to new beneficiary during the first 12 months of Medicare enrollment G0438: Annual wellness visit; includes a personalized prevention plan of service (pps), initial visit G0439: Annual wellness visit, includes a personalized prevention plan of service (pps), subsequent visit G0463: Hospital outpatient clinic visit for assessment and management of a patient G2010: Remote evaluation of recorded video and/or images submitted by an established patient (for example, store and forward), including interpretation with follow-up with the patient within 24 business hours, not originating from a related e/m service provided within the previous 7 days nor leading to an e/m service or procedure within the next 24 hours or soonest available appointment G2012: Brief communication technology-based service, for example, virtual check-in, by a physician or other qualified health care professional who can report evaluation and management services, provided to an established patient, not originating from a related e/m service provided within the previous 7 days nor leading to an e/m service or procedure within the next 24 hours or soonest available appointment; 5-10 minutes of medical discussion G2250: Remote assessment of recorded video and/or images submitted by an established patient (for example, store and forward), including interpretation with follow-up with the patient within 24 business hours, not originating from a related service provided within the previous 7 days nor leading to a service or procedure within the next 24 hours or soonest available appointment G2251: Brief communication technology-based service, for example, virtual check-in, by a qualified health care professional who cannot report evaluation and management services, provided to an established patient, not originating from a related service provided within the previous 7 days nor leading to a service or procedure within the next 24 hours or soonest available appointment; 5-10 minutes of clinical discussion G2252: Brief communication technology-based service, for example, virtual check-in, by a physician or other qualified health care professional who can report evaluation and management services, provided to an established patient, not originating from a related e/m

Description	CPT/HCPCS/ICD10CM
	service provided within the previous 7 days nor leading to an e/m service or procedure within the next 24 hours or soonest available appointment; 11-20 minutes of medical discussion T1015: Clinic visit/encounter, all-inclusive

Note: The codes listed are informational only; this information does not guarantee benefit coverage or reimbursement.

Helpful tips:

- If a Patient tests negative for group A strep but insists on an antibiotic:
  - *Refer to the illness as a sore throat due to a cold virus. Antibiotics do not work on viruses. Patients tend to associate the label with a less-frequent need for antibiotics.*
  - *Write a prescription for symptom relief, like over-the-counter medications.*
- Educate patients on the difference between bacterial and viral infections. This is the key point in the success of this measure.
- Discuss with patients' ways to treat symptoms:
  - *Get extra rest.*
  - *Drink plenty of fluids.*
  - *Use over-the-counter medications.*
  - *Use the cool-mist vaporizer and nasal spray for congestion.*
  - *Eat ice chips or use throat spray/lozenges for sore throats.*
- Educate patients and their parents or caregivers that they can prevent infection by:
  - *Washing hands frequently.*
  - *Disinfecting toys.*
  - *Keeping the child out of school or day care for at least 24 hours until antibiotics have been taken and symptoms have improved.*
- If utilizing an EMR system, consider electronic data sharing with your health plan to capture all coded elements. Contact your provider relationship management representative for additional details and questions.

How can we help?

- Patients may be eligible for transportation assistance at no cost, contact Patient Services for arrangement.

Well-Child Visits in the First 30 Months of Life (W30)

This HEDIS measure looks at the percentage of patients who had the following number of well-child visits with a PCP during the last 15 months. The following rates are reported:

- Well-Child Visits in the First 15 Months: children who turned 15 months old during the measurement year: Six or more well-child visits
- Well-Child Visits for Age 15 Months to 30 Months: children who turned 30 months old during the measurement year: Two or more well-child visits

Record your efforts

Documentation from the medical record must include a note indicating a visit with a PCP, the date when the well-child visit occurred and evidence of *all* of the following:

- A health history: Health history is an assessment of the Patient's history of disease or illness. Health history can include, but is not limited to, past illness (or lack of illness), surgery or hospitalization (or lack of surgery or hospitalization) and family health history.
- A physical developmental history: Physical developmental history assesses specific age-appropriate physical developmental milestones, which are physical skills seen in children as they grow and develop.
- A mental developmental history: Mental developmental history assesses specific age-appropriate mental developmental milestones, which are behaviors seen in children as they grow and develop.
- A physical exam (for example, height, weight, BMI, heart, lungs, abdomen, more than one system assessed)
- Health education/anticipatory guidance: Health education/anticipatory guidance is given by the health care provider to parents or guardians in anticipation of emerging issues that a child and family may face.

Exclusions:

- Patients who use hospice services or elect to use a hospice benefit any time during the measurement year.
- Patients who die any time during the measurement year.

Description	CPT/HCPCS
Well Care Visit	CPT 99381, 99382, 99383, 99384, 99385, 99391, 99392, 99393, 99394, 99395, 99461 HCPCS G0438: Annual wellness visit; includes a personalized prevention plan of service (pps), initial visit G0439: Annual wellness visit, includes a personalized prevention plan of service (pps), subsequent visit

Description	CPT/HCPCS
	S0302: Completed early periodic screening diagnosis and treatment (EPSDT) service (list in addition to code for appropriate evaluation and management service)

Note: The codes listed are informational only; this information does not guarantee benefit coverage or reimbursement.

Helpful tips:

- Use your patient roster to contact patients who are due for an exam or are new to your practice.
- Schedule the next visit at the end of the appointment.
- If you use EMRs, consider creating a flag to track patients due or past due for a visit. If you do not use EMRs, consider creating a manual tracking method. Sick visits may be a missed opportunity for your Patient to get a wellness exam.
- Consider extending your office hours into the evening, early morning, or weekend to accommodate working parents.
- If utilizing an EMR system, consider electronic data sharing with your health plan to capture all coded elements. Contact your provider relationship management representative for additional details and questions.

How can we help?

We help you meet this benchmark by:

- Offering current *Clinical Practice Guidelines* on our provider self-service website.
- Providing individualized reports of your patients overdue for services.
- Encouraging patients to get preventive care through our programs. Contact your provider relationship management representative for more information.
- Patients may be eligible for transportation assistance at no cost, contact Patient Services for arrangement.

Weight Assessment and Counseling for Nutrition and Physical Activity for Children/ Adolescents (WCC)

This HEDIS measure looks at the percentage of patients ages 3 to 17 years who had an outpatient visit with a PCPs or OB/GYN and who had evidence of the following during the measurement year:

- *BMI Percentile documentation
- Counseling for Nutrition
- Counseling for Physical Activity

*Because BMI norms for youth vary with age and gender, this measure evaluates whether BMI percentile is assessed rather than an absolute BMI value.

Record your efforts

Three separate rates are reported:

- Height, weight and BMI percentile (not BMI value):
  - *May be a BMI growth chart if utilized.*
- Counseling for nutrition (diet):
  - *Services rendered during a telephone visit, e-visit or virtual check-in meet criteria.*
- Counseling for physical activity (sports participation/exercise):
  - *Services rendered for obesity or eating disorders may be used to meet criteria.*
  - *Services rendered during a telephone visit, e-visit or virtual check-in meet criteria.*

Exclusions:

- Patients with a diagnosis of pregnancy
- Patients who use hospice services or elect to use a hospice benefit any time during the measurement year
- Patients who die any time during the measurement year

Description	CPT/HCPCS/ICD10CM/LOINC
BMI Percentile	ICD10CM Z68.51: Body mass index [BMI] pediatric, less than 5th percentile for age Z68.52: Body mass index [BMI] pediatric, 5th percentile to less than 85th percentile for age Z68.53: Body mass index [BMI] pediatric, 85th percentile to less than 95th percentile for age Z68.54: Body mass index [BMI] pediatric, greater than or equal to 95th percentile for age LOINC 59574-4: Body mass index (BMI) [Percentile] 59575-1: Body mass index (BMI) [Percentile] Per age

Description	CPT/HCPCS/ICD10CM/LOINC
	59576-9: Body mass index (BMI) [Percentile] Per age and sex
Nutrition Counseling	CPT 97802, 97803, 97804 HCPCS G0270: Medical nutrition therapy; reassessment and subsequent intervention(s) following second referral in same year for change in diagnosis, medical condition or treatment regimen (including additional hours needed for renal disease), individual, face to face with the patient, each 15 minutes G0271: Medical nutrition therapy, reassessment and subsequent intervention(s) following second referral in same year for change in diagnosis, medical condition, or treatment regimen (including additional hours needed for renal disease), group (2 or more individuals), each 30 minutes G0447: Face-to-face behavioral counseling for obesity, 15 minutes S9449: Weight management classes, non-physician provider, per session S9452: Nutrition classes, non-physician provider, per session S9470: Nutritional counseling, dietitian visit
Physical Activity Counseling	HCPCS G0447: Face-to-face behavioral counseling for obesity, 15 minutes S9451: Exercise classes, non-physician provider, per session
Encounter for Physical Activity Counseling	ICD10CM Z02.5: Encounter for examination for participation in sport Z71.82: Exercise counseling

Note: The Logical Observation Identifiers Names and Codes (LOINC) are for reporting clinical observations and laboratory testing. The codes listed are informational only; this information does not guarantee benefit coverage or reimbursement.

Helpful tips:

- Measure height and weight at least annually and document the BMI percentile for age in the medical record.
- Consider incorporating appropriate nutritional and weight management questioning and counseling into your routine clinical practice.
- Document any advice you give the Patient.
- Document face-to-face discussion of current nutritional behavior, like appetite or meal patterns, eating and dieting habits, any counselling or referral to nutrition education, any nutritional educational materials that were provided during the visit, anticipatory guidance for nutrition, eating disorders, nutritional deficiencies, underweight, and obesity or overweight discussion.
- Document face-to-face discussion of current physical activity behaviors, like exercise routines, participation in sports activities or bike riding, referrals to physical activity,

educational material that was provided, anticipatory guidance on physical activity, and obesity or overweight discussion.
- If utilizing an EMR system, consider electronic data sharing with your health plan to capture all coded elements. Contact your provider relationship management representative for additional details and questions.

How can we help?

We help you meet this benchmark by:

- Offering current *Clinical Practice Guidelines* on our provider self-service website.
- Helping identify community resources, such as health education classes that may be available in your area.
- Patients may be eligible for transportation assistance at no cost, contact Patient Services for arrangement.

Child and Adolescent Well-Care Visits (WCV)

This HEDIS measure looks at the percentage of patients ages 3 to 21 years who had at least one comprehensive well-care visit with a PCP or an OB/GYN practitioner during the measurement year.

Record your efforts

Documentation must include a note indicating a visit to a PCP, the date when the well-child visit occurred, and evidence of *all* of the following:

- A health history: Health history is an assessment of the Patient's history of disease or illness. Health history can include, but is not limited to, past illness (or lack of illness), surgery or hospitalization (or lack of surgery or hospitalization) and family health history.
- A physical developmental history: Physical developmental history assesses specific age-appropriate physical developmental milestones, which are physical skills seen in children as they grow and develop.
- A mental developmental history: Mental developmental history assesses specific age-appropriate mental developmental milestones, which are behaviors seen in children as they grow and develop.
- A physical exam (for example, height, weight, BMI, heart, lungs, abdomen, more than one system assessed)
- Health education/anticipatory guidance: Health education/anticipatory guidance is given by the health care provider to parents or guardians in anticipation of emerging issues that a child and family may face.

Exclusions:

- Patients who use hospice services or elect to use a hospice benefit any time during the measurement year.
- Patients who die any time during the measurement year.

Description	CPT/HCPCS
Well Care Visit	CPT 99381, 99382, 99383, 99384, 99385, 99391, 99392, 99393, 99394, 99395, 99461 HCPCS G0438: Annual wellness visit; includes a personalized prevention plan of service (pps), initial visit G0439: Annual wellness visit, includes a personalized prevention plan of service (pps), subsequent visit S0302: Completed early periodic screening diagnosis and treatment (epsdt) service (list in addition to code for appropriate evaluation and management service)

Note: The codes listed are informational only; this information does not guarantee benefit coverage or reimbursement.

Helpful tips:

- Use your patient roster to contact patients who are due for an annual exam.
- Schedule the next visit at the end of the appointment.
- If you use EMRs, consider creating a flag to track patients due or past due for preventive services. If you do not use EMRs, consider creating a manual tracking method for well checks. Sick visits may be missed opportunities for your Patient to get health checks.
- Consider extending your office hours into the evening, early morning, or weekend to accommodate working parents.
- If utilizing an EMR system, consider electronic data sharing with your health plan to capture all coded elements. Contact your provider relationship management representative for additional details and questions.

How can we help?

We help you meet this benchmark by:

- Offering current *Clinical Practice Guidelines* on our provider self-service website.
- Providing individualized reports of your patients overdue for services.
- Encouraging patients to get preventive care through our programs.
- Patients may be eligible for transportation assistance at no cost, contact Patient Services for arrangement.
