

HEDIS® Category II Coding Tips

Background: The following CPT® category II codes can help reduce the number of medical records we request throughout the year. Adding these codes to a claim will help us identify additional information about the visit and improve the accuracy of reporting quality measures.

Prenatal and postpartum care

Initial prenatal care visit	0500F: initial prenatal care visit (report at first prenatal encounter with healthcare professional providing obstetrical care; report also date of visit and, in a separate field, the date of the last menstrual period [LMP]) (Prenatal) or 0501F: prenatal flow sheet documented in medical record by first prenatal visit (documentation includes at minimum blood pressure, weight, urine protein, uterine size, fetal heart tones, and estimated date of delivery); report also date of visit and, in a separate field, the date of the last menstrual period [LMP] (Note: If reporting 0501F Prenatal flow sheet, it is not necessary to report 0500F Initial prenatal care visit) (Prenatal)
Subsequent prenatal care visit	0502F
Postpartum care visit	0503F: postpartum visit completed on or between 7 and 84 days after delivery

Diabetes care
