

On behalf of Jennifer Langer Jacobs
Assistant Commissioner of the Division of Medical Assistance and Health Services

Please view and distribute the three (3) following documents:

1. Letter from New Jersey Department of Health (NJDOH) Commissioner Judith Persichilli
2. Phase 1A Factsheet
3. List of current New Jersey Vaccine Sites (subject to change)

We request your assistance sharing this key information with healthcare workers. The State of New Jersey's goal is to ensure an equitable and efficient COVID-19 Vaccination Program.

Thank you for your assistance.

SHEILA Y. OLIVER
Lt. Governor

JUDITH M. PERSICILLI, RN, BSN, MA
Commissioner

December 29, 2020

To whom it may concern,

Vaccination for COVID-19 began in New Jersey on Tuesday, December 15, 2020. I am writing to request your help. Please share this important information about COVID-19 vaccine access to all healthcare workers, paid and unpaid.

New Jersey has experienced over 400,000 positive cases and approximately 16,000 deaths associated with COVID-19. Vaccination is the latest tool in our toolbox to stop the spread. New Jersey recently rolled out COVID-19 vaccines step-by-step to serve all who live, work or study in the state.

Starting in mid-December and continuing into early 2021, vaccine access will be given to New Jersey's Phase 1A Group: health care workers, who are paid and unpaid persons serving in healthcare settings who have the potential for direct or indirect exposure to patients or infectious materials. Phase 1A also includes long-term care residents and staff. More information about Phase 1A and current vaccine availability is enclosed.

DOH requests your assistance to share key information that ensures an equitable and efficient COVID-19 Vaccination Program. I ask for your help with the following six actions:

1. Encourage your community to stay up-to-date

- Learn the latest from the New Jersey Department of Health:
https://www.state.nj.us/health/cd/topics/covid2019_vaccination.shtml
- Subscribe to *Vax Matters*, the weekly newsletter issued by NJDOH focused on key updates regarding COVID-19 vaccination in New Jersey:
<https://www.state.nj.us/health/cd/topics/vmsignup.shtml>
- Read the latest from the Centers for Disease Control and Prevention (CDC):
<https://www.cdc.gov/coronavirus/2019-ncov/vaccines/index.html>

2. Share factual and reliable information

- Follow @NJDeptofHealth, @NJGov, and @GovMurphy on social media
- Visit covid19.nj.gov for information on the State's COVID-19 response
- Join a COVID-19 Vaccination Essentials webinar co-hosted by the New Jersey Department of Health, Rutgers Project ECHO, and the Nicholson Foundation:
https://rwjms.rutgers.edu/community_health/other/project-echo/covid-19

3. Inform Phase 1A health care workers to pre-register for COVID-19 vaccination

- During early 2021, New Jersey will launch its statewide vaccine scheduling system, the New Jersey Vaccine Scheduling System (NJVSS), to help all potential Phase 1A vaccine recipients to identify nearby points of dispensing sites (PODs) and schedule an appointment. I will be sending you a follow-up email with more information on this vaccine scheduling system in the next 1-2 weeks. Upon receiving the follow-up email, please share the NJVSS link with health care workers in your network.
- A link to NJVSS will also be posted on the State's COVID-19 portal: covid19.nj.gov

4. Host or staff a point of dispensing site

- Pre-register to host a point of dispensing site:
<https://njiis.nj.gov/core/web/index.html#/newFacilityEnrollment>
- **Coming soon!** Sign-up to help supplement staffing at existing point of dispensing sites.

5. Continue public health best practices

- Thank you for continuing to wear masks, social distancing, practicing hand hygiene, and following public health guidance and directives for everyone's safety.
- Sign up to fight COVID by downloading the COVID Alert NJ App here:
<https://covid19.nj.gov/pages/app>

6. Help health care workers get vaccinated

- If you are eligible under the definition of Phase 1A, I encourage you to schedule your appointment for the COVID-19 vaccine. This will protect yourself and your community against severe COVID-19 symptoms.
- Vaccine dispensing sites are NOW OPEN across New Jersey for Phase 1A healthcare workers. Attached is a list of open vaccine dispensing sites.
- Potential vaccine recipients that fall in Phase 1A healthcare workers can choose the vaccine dispensing site nearest to their home or work
- Please call the site's phone number to schedule an appointment.
- No walk-in appointments are available at this time.
- Please note that vaccine dispensing sites vary in hours of operation and scheduling processes. We ask for your patience as the State and vaccine dispensing sites continue to refine our operations for the vaccines program.
- Those not yet eligible for the vaccine, you can learn more about the vaccines program on covid19.nj.gov.

We are trying to reach as many healthcare workers as possible. You may receive this message more than once – I apologize for this inconvenience. Your help is critical in ensuring a successful COVID-19 vaccination program. The State of New Jersey appreciates your support.

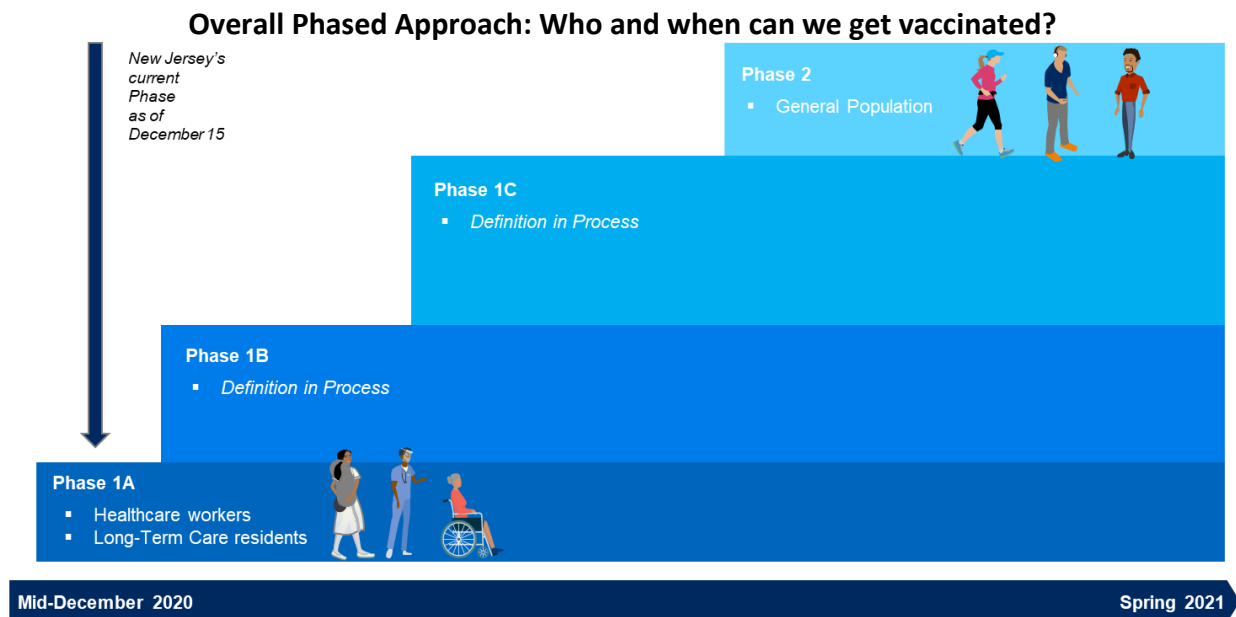

Sincerely,

Judith Persichilli, RN, BSN, MA
New Jersey Department of Health Commissioner

New Jersey's Phased Approach to COVID-19 Vaccination: Phase 1A

New Jersey is using a phased approach to COVID-19 vaccination to ensure that limited vaccines are distributed in a fair and equitable manner. Phase 1A started December 15, 2020. During 2021, additional people will become eligible to receive vaccination in New Jersey. Decisions about priority groups and how the doses will be spread across the state may change based on changes in vaccine supply and public demand.

How did New Jersey determine the Phased Approach?

New Jersey's phased approach is informed by the Centers for Disease Control and Prevention (CDC), Advisory Committee for Immunization Practices (ACIP), the National Academies of Sciences, Engineering, and Medicine (NASEM), the New Jersey Department of Health COVID-19 Professional Advisory Committee (PAC), the Coronavirus Task Force (CTF), and extensive stakeholder engagement.

When does Phase 1A start in New Jersey?

COVID-19 vaccinations began in New Jersey on December 15, 2020. This is after the Food and Drug Administration (FDA) issued an emergency use authorization (EUA) for a COVID-19 vaccine and after the Centers for Disease Control and Prevention (CDC) adopted recommendations of the Advisory Committee for Immunization Practices (ACIP).

When will New Jersey change phases?

Specific dates are not known at this time. Factors like supply of vaccine, public confidence and uptake, time, and federal guidance will inform data-driven decisions. Governor Murphy and Commissioner of Health Persichilli will announce when New Jersey changes phases.

There are approximately 650,000 people eligible for Phase 1A, so it may be weeks before New Jersey moves to Phase 1B.

Who can get vaccinated during Phase 1A?

During Phase 1A, New Jersey will build step by step to serve all eligible populations. New Jersey started in December 2020 by fortifying our hospitals, including prioritizing those at highest risk of exposure to

New Jersey's Phased Approach to COVID-19 Vaccination: Phase 1A

COVID-19. New Jersey's plan will continue into our vulnerable skilled nursing facilities, using the CDC-supported Pharmacy Partnership for Long-term Care. As Phase 1A progresses, non-hospital-based healthcare personnel and residents of other long-term care settings will also become eligible.

How do I prove that I am eligible for vaccination?

You are eligible if you live, work, or are being educated in New Jersey and can self-identify as meeting the criteria for the current sub-phase. No professional nor medical documentation is required.

Why does Phase 1A include healthcare personnel and long-term care residents?

According to the [Advisory Committee for Immunization Practices](#):

- Health care settings in general, and long-term care settings in particular, can be high-risk locations for SARS-CoV-2 exposure and transmission.
- Early protection of health care personnel is critical to preserve capacity to care for patients with COVID-19 or other illnesses.
- Long-term care facility residents, because of their age, high rates of underlying medical conditions, and congregate living situation, are at high risk for infection and severe illness from COVID-19.

Who are "healthcare personnel" in Phase 1A?

Healthcare personnel are paid and unpaid persons serving in health care settings who have the potential for direct or indirect exposure to patients or infectious materials.

This includes any type of worker within a healthcare setting. Examples include, but are not limited to:

- ✓ licensed healthcare professionals like doctors, nurses, pharmacists, and dentists
- ✓ staff like receptionists, janitors, mortuary services, laboratory technicians
- ✓ consultants, per diem, and contractors who are not directly employed by the facility
- ✓ unpaid workers like health professional students, trainees, volunteers, and essential caregivers
- ✓ community health workers, doulas, and public health professionals like Medical Reserve Corps
- ✓ personnel with variable venues like EMS, paramedics, funeral staff, and autopsy workers
- ✓ other paid or unpaid people who work in a healthcare setting, who may have direct or indirect contact with infectious persons or materials, and who cannot work from home

Who are "unpaid" healthcare workers?

Persons who work within a healthcare setting, but are not paid. These include, but are not limited to health professional students, trainees, volunteers, and essential caregivers.

What are "healthcare settings" in Phase 1A?

For COVID-19 vaccination, any venue where healthcare occurs is a healthcare setting.

Examples include, but are not limited to:

- ✓ Acute, pediatric, and behavioral health hospitals and ambulatory surgical centers
- ✓ Health facilities like psychiatric facilities, Federally Qualified Health Centers, and rehabs
- ✓ Clinic-based settings like urgent care clinics, dialysis centers, and family planning sites
- ✓ Long-term care settings like nursing homes, assisted living facilities, group homes, and others
- ✓ Occupational-based healthcare settings like health clinics within workplaces, shelters, jails, colleges and universities, and K-12 schools
- ✓ Community-based healthcare settings like PACE and Adult Living Community Nursing
- ✓ Home-based settings like hospice, home care, and visiting nurse services

New Jersey's Phased Approach to COVID-19 Vaccination: Phase 1A

- ✓ Office-based healthcare settings like physician and dental offices
- ✓ Public health settings like local health departments, LINCS agencies, harm reduction centers, and medicinal marijuana programs
- ✓ Retail, independent, and institutional pharmacies
- ✓ Other settings where healthcare is provided

Where can healthcare personnel get vaccinated?

New Jersey is developing an extensive network of vaccination sites that will be open to all healthcare workers. By early January, the vaccination sites network will include acute care hospitals, large state-coordinated mega sites, county/local sites, retail pharmacies and other medical locations. At this time we are not able to arrange for all groups to receive distributions directly, so healthcare personnel may need to go off-site to be vaccinated. Hospital workers and volunteers will have an opportunity to receive the vaccine at the hospital where they work or volunteer.

All other healthcare workers and volunteers, including those outside of hospitals and long-term care, will be able to receive the vaccine through other vaccination sites at pharmacies, urgent care centers, federally qualified health centers, hospitals, local health departments, other state- and county-run sites, and other medical clinics.

How can a healthcare worker schedule an appointment to be vaccinated?

New Jersey will launch a statewide vaccine scheduling system to help consumers connect with identified nearby points of dispensing sites. More details are coming soon.

If you are healthcare worker who is not based in a hospital, an appointment may not be available to you during the first weeks of the vaccination campaign due to significantly limited vaccine availability. NJDOH hopes to be able to serve all healthcare workers who wish to be vaccinated by the end of January 2021, pending vaccine availability.

Who are "long-term care residents" in Phase 1A?

Long-term care residents are adults who reside in facilities that provide a range of services, including medical and personal care, to persons who are unable to live independently.

What are "long-term care settings" in Phase 1A?

Facilities that provide a range of services, including medical and personal care, to persons who are unable to live independently. This includes, but is not limited to:

- ✓ Skilled nursing facilities
- ✓ Veteran's homes
- ✓ Assisted living facilities, continuing care retirement communities, and personal care homes
- ✓ Group homes like residential care homes, adult family homes, adult foster homes, and intellectual and developmental disabilities group homes
- ✓ HUD 202 Supportive Housing for the Elderly Program residences
- ✓ Institutional settings like psychiatric hospitals, correctional institutions, county jails, and juvenile detention facilities (for eligible minors, e.g. 16+ years of age may be eligible for Pfizer vaccine under the emergency use authorization)
- ✓ Other vulnerable, congregate, long-term settings

What is the [Pharmacy Partnership for Long-term Care](#) and who will it serve in Phase 1A?

New Jersey's Phased Approach to COVID-19 Vaccination: Phase 1A

Residents and staff of long-term care facilities have been a priority throughout the state's vaccination planning. New Jersey and federal agencies have partnered with CVS and Walgreens to provide end-to-end management of the vaccination process, including storage, handling, cold chain management, on-site vaccinations, and fulfillment of reporting requirements at certain types of long-term care facilities.

During the October sign-up period, New Jersey actively promoted this opportunity to long-term care providers and now is working with CDC and Operation Warp Speed to optimize the number of facilities accepted into the program. For enrolled facilities, the partnership will facilitate safe and effective vaccination for residents and healthcare personnel serving within their facility who have not yet been vaccinated off-site. CVS and Walgreens will contact enrolled facilities to coordinate, share information, and, when the partnership is activated during Phase 1A, to begin scheduling on-site clinics.

The Partnership will begin with serving skilled nursing facilities and will expand to other types of long-term care settings. New Jersey has also started to establish alternative providers for settings that are not served by the Partnership.

What data will I need to share to be vaccinated?

NJHIS will securely store the vaccine recipient's name, address, date of birth, race, ethnicity, and gender. These are standard data elements that have been used across vaccines administered in New Jersey. These will be requested during pre-registration and/or on-site. Information about the vaccine provider, substance, and administration will be collected from the POD personnel.

There are other data that may be asked of vaccine recipients and that will not be stored in NJHIS. Depending on the POD and its scheduling process, New Jerseyans can also expect to provide additional demographic and occupational data to ensure equitable and efficient scheduling of vaccinations. These data points will be informed by ACIP recommendations about prioritization (e.g. Phase 1A will include healthcare personnel).

Finally, medical screening questions will be asked to assess eligibility under the EUA and ACIP recommendations specific to the vaccine product offered at the point of dispensing.

List Updated: 12/24/20 Subject to Change

Please note that the following locations are available for healthcare workers to make an appointment to receive a vaccine. Vaccination sites will verify that you are healthcare worker before administering the vaccine, and appropriate documentation will be required.
