

## Medicaid continuous glucose monitoring systems

On December 1, 2021, Amerigroup Community Care will implement a change regarding continuous glucose monitoring systems (CGMs). In 2020, we made it more convenient for members to obtain CGMs (devices and supplies) at their preferred in-network retail pharmacy or the IngenioRx\* home delivery pharmacy. Beginning on December 1, 2021, CGM access (including but not limited to HCPCS codes: A9276, A9277, A9278, K0553, K0554) will only be available to an Amerigroup member through their in-network retail pharmacy or IngenioRx home delivery pharmacy and no longer a durable medical equipment (DME) provider. Members receiving CGMs and their prescribers will be notified of the change. Please refer prescribers to Provider Services at **800-454-3730** or members to Member Services at **800-600-4441** for additional questions.

Note – This change only applies to CGMs and not insulin pump delivery systems.

\* IngenioRx, Inc. is an independent company providing pharmacy benefit management services on behalf of Amerigroup Community Care.
