Pharmacy-Specific Guidance

Pharmacies may bill for COVID-19 vaccine administration when the performing provider is a pharmacist.

- For the fee-for-service program, bill as a HIPAA 837 transaction using the pharmacy billing taxonomy of 193200000X and include the place of service.
- For agency-contracted managed care organizations (MCOs), bill as a pharmacy point-of-sale transaction and follow NCPDP standards.

Pharmacy technicians and Pharmacy Interns may administer the vaccine, but it must be billed under the supervising pharmacist's NPI as the performing provider.

HCA is directing the MCOs to make this change as soon as possible, but no later than March 15, 2021. Please respond no later than Friday, February 19th with the expected date your systems can begin accepting these claims.

Important Note: Encounters submitted by MCOs for paid pharmacy claims will continue to reject when the NPI is not in ProviderOne. Rejections related to the COVID vaccine and administration will be allowed as a discrepancy item for the encounter data quarterly reconciliation. All other NPI rejections on pharmacy encounters will continue to be an unallowed discrepancy item. Any questions about this discrepancy and the reconciliation should be sent to HIPAA-HELP@hca.wa.gov.

Any questions or concerns please contact HCA pharmacy team at AppleHealthPharmacyPolicy@hca.wa.gov and cc the HCA MCO mailbox.
